

EMPOWERING YOUR BUSINESS FOR THE AI-DRIVEN FUTURE

Technology is transforming businesses, unlocking unprecedented opportunities for innovation and growth. Organisations must leverage cutting-edge solutions like artificial intelligence (AI) and automation to thrive in this fast-paced landscape.

Lim-Loges & Masters provides the tools, expertise, and strategies needed to build agile, future-ready teams that harness the potential of AI.

This AI workshop is designed to provide participants with a comprehensive understanding of artificial intelligence, tailored to their specific industry needs. The session covers:

- ♦ **AI Fundamentals:** An introduction to the core concepts and principles of AI.
- ♦ **Industry-Specific Applications:** Insights into how AI can be effectively applied within the participants' professional domains.
- ♦ **Hands-On Prompt Engineering:** Practical and tailored exercises based on the client's industry
- ♦ **Strategic AI Adoption:** Guidance on establishing AI policies and procedures to integrate AI into organisational workflows effectively.

The workshop aims to educate attendees, foster collaboration, and explore opportunities to develop bespoke AI systems.

ABOUT JEAN-SÉBASTIEN LEMAY

Jean-Sébastien Lemay is a highly qualified software architect. With over 15 years of experience in building tailor-made software solutions, Jean-Sébastien has worked with diverse companies in Canada, Hong Kong and the Philippines, leveraging cutting-edge technologies to optimise their processes and build new revenue opportunities.
